CASE STUDY

Almost all the assignments in the class suspiciously have the same structure, stock phrases, and conclusions.

CASE STUDY

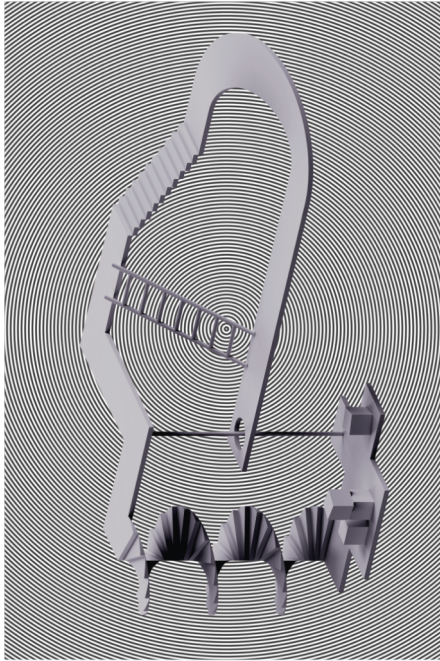

A student produces an assignment using AI in a very obvious way.

CASE STUDY

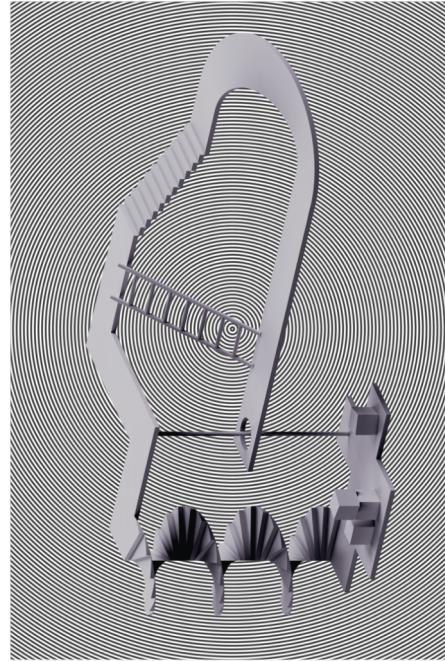

A fellow teacher tells you he no longer makes slides for his classes and instead generates them all with an AI tool.

CASE STUDY

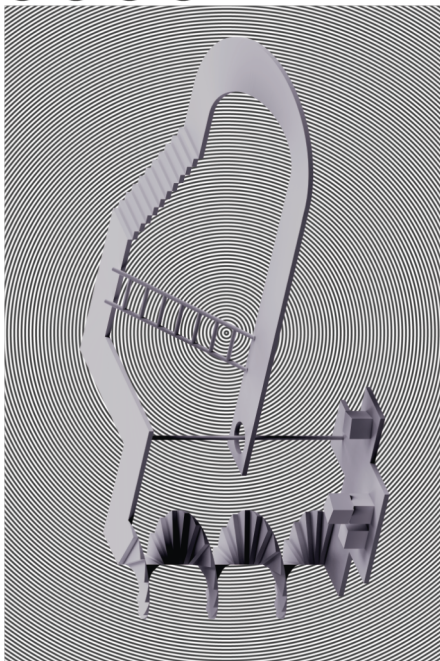

When I run the student's assignment through an AI detector, it comes back as 100% AI-generated.

	CASE STUDY <i>Your colleague does all of the grading using AI.</i>	CASE STUDY <i>My coworkers generate exams using AI.</i>	
	CASE STUDY <i>A student includes AI-generated images in a presentation, even though the presentation itself is original work.</i>	CASE STUDY <i>You overhear two students talking about a new AI software that does homework for you.</i>

	CASE STUDY	CASE STUDY	
	<i>You announce that you're going to hold an oral final exam, and 20% of the students in the class drop out.</i>	<i>The average grade on assignments is 9.5 (out of 10), but everyone fails the exam.</i>	
	CASE STUDY	CASE STUDY	
		<i>You openly discuss AI use and critical/ethical issues, and when you mention Grok, people start generating images of Black Nazis.</i>
